

ROYAL VOLUNTARY SERVICE

COVID-19 PROJECT

Royal Voluntary Service (RVS) were approved by NHSE as the service to provide volunteers at local and national mass Covid-19 vaccination sites.

Through our existing relationship with RVS, we were invited to undertake the project on their behalf, along with other agencies.

A dedicated account manager was appointed as sole point of contact to ensure project efficiency and clear communication. From the briefing conversation we had with several members of the senior management team at RVS, we developed a clear plan of action to meet expectations:

Roles

7 x Covid Regional Relationship Managers
2 x Local Engagement Managers
2 x Volunteer Support Team Members
2 x Safeguarding Team Members
1 x Data Analyst

Successes

Over a period of three weeks we sourced, briefed, shortlisted and arranged in excess of 25 video interviews with RVS to ensure the most suitable candidates were selected.
Successful candidates were fully compliant, and RVS were provided with staff profiles and RVS documents within 24 hours of an offer.
All candidates offered accepted and started as expected.
Excellent feedback from both candidates and RVS.
100% fill rate by Michael Page for all allocated job on this project

Following the success of the project we received positive feedback that gained us exclusivity for future projects, resulting in additional roles.

For further information on how we can assist with your Covid-19 project or interim/permanent recruitment requirements please contact:
